

## Erik Erickson's Eight Stages of Psychosocial Development

Stage	Ages	Basic Conflict	Important Event	Summary
<b>HYPERLINK "/andersmd/ERIK/stage1.HTML"1. Oral-Sensory</b>				
Birth to 12 to 18 months	Trust vs. Mistrust	Feeding	The infant must form his/her first loving, trusting relationship with the caregiver -- or develop a sense of mistrust.	
<b>HYPERLINK "/andersmd/ERIK/stage2.HTML"2. Muscular-Anal</b>				
18 months to 3 years	Autonomy vs. Shame/Doubt	Toilet training	The child's energies are directed toward the development of physical skills, including walking, grasping, and rectal sphincter control. The child learns control, but may develop shame and doubt if not handled well.	
<b>HYPERLINK "/andersmd/ERIK/stage3.HTML"3. Locomotor</b>				
3 to 6 years	Initiative vs. Guilt	Independence	The child continues to become more assertive and to take more initiative, but may be too forceful, leading to guilt feelings.	
<b>HYPERLINK "/andersmd/ERIK/stage4.HTML"4. Latency</b>				

6 to 12 years	Industry vs. Inferiority	School	The child must deal with demands to learn new skills or risk a sense of inferiority, failure and incompetence.
---------------	--------------------------	--------	--

<b>5. Adolescence</b>	12 to 18 years	Identity vs. Role Confusion	Peer relationships	The teenager must achieve a sense of identity in occupation, sex roles, politics, and religion.
-----------------------	----------------	-----------------------------	--------------------	---

<b>6. Young Adulthood</b>	19 to 40 years	Intimacy vs. Isolation	Love relationships	The young adult must develop intimate relationships or suffer feelings of isolation.
---------------------------	----------------	------------------------	--------------------	--

<b>7. Middle Adulthood</b>	40 to 65 years	Generativity vs. Stagnation	Parenting	Each adult must find some way to satisfy and support the next generation.
----------------------------	----------------	-----------------------------	-----------	---

**HYPERLINK "/andersmd/ERIK/stage8.HTML"8. Maturity**

65 to death	Ego Integrity vs. Despair	Reflection and acceptance of life	The culmination is a sense of oneself as one is and of feeling fulfilled.
-------------	---------------------------	-----------------------------------	---

<p>3-6 years Initiative vs. Guilt Independence</p>	<p><i>The child continues to become more assertive and to take more initiative, but may be too forceful, leading to guilt feelings.</i></p> <p><b>Initiative</b> Adults encourage independence in planning and undertaking activities (games) Children begin to get their own ideas about activities they wish to pursue</p> <p><b>Guilt</b> Adults discourage independent activities Children develop guilt about their needs and desires</p>
--	--

<p><b>4. Latency</b></p> <p><b>6. Young Adulthood</b></p> <p>6-12 years</p> <p><b>Industry vs. Inferiority</b></p> <p><b>Intimacy vs. Isolation</b></p> <p>Love Relationships</p>	<p><i>The child must deal with demands to learn new skills or risk a sense of inferiority, failure and incompetence.</i></p> <p><b>Intimacy</b></p> <p><b>Industry</b></p> <p><i>Commitment to another person (marriage)</i></p> <p><i>Working hard</i></p> <p><i>Form intimate relationships with others that may require sacrifice and compromise</i></p> <p><i>Delayed gratification (work before pleasure)</i></p> <p><b>Isolation</b></p> <p><b>Inferiority</b></p> <p><i>Punished for unsatisfactory efforts</i></p> <p><i>Failure to meet real or perceived expectations,</i></p>
	<p><i>feelings of incompetence</i></p>
<p><b>5. Adolescence</b></p> <p>12 to 18 years</p> <p><b>Identity vs. Role Confusion</b></p> <p>Peer Relationships</p>	<p><i>The teenager must achieve a sense of identity in occupation, sex roles, politics, and religion.</i></p> <p><b>Identity</b></p> <p><i>Acceptance of place in family and community</i></p> <p><i>Strong sense of life direction and goals</i></p> <p><i>Contributing member of family and community</i></p> <p><b>Role Confusion</b></p> <p><i>Unsettled regarding place in family and community</i></p> <p><i>Uncertainty and indecision about life direction and goals</i></p> <p><i>Lacks sense of importance in family and community</i></p>

<p><b>6. Young Adulthood</b></p> <p>19 to 40 years Intimacy vs. Isolation Love Relationships</p>	<p><i>The young adult must develop intimate relationships or suffer feelings of isolation.</i></p> <p><b>Intimacy</b> Commitment to another person (marriage) Form intimate relationships with others that may require sacrifice and compromise</p> <p><b>Isolation</b> Reluctance or inability to let go of the satisfaction of their own needs Inability to form intimate relationships</p>
<p><b>7. Middle Adulthood</b></p> <p>40 to 65 years Generativity vs. Stagnation Parenting</p>	<p><i>Each adult must find some way to satisfy and support the next generation.</i></p> <p><b>Generativity</b> Makes a contribution to society Helps to guide future generations Sense of productivity and accomplishment</p> <p><b>Stagnation</b> Self-centered Unable or unwilling to help move society forward</p>
<p><b>8. Maturity</b></p> <p>65 to Death Ego Integrity vs. Despair Reflection and Acceptance of Life</p>	<p><i>The culmination is a sense of oneself as one is and of feeling fulfilled.</i></p> <p><b>Ego Integrity</b> Upon reflection of one's life there is a feeling of contentment Belief that their life has been happy and productive</p> <p><b>Despair</b> Upon reflection of one's life there are feelings of despair and dissatisfaction Life was full of disappointments and unachieved goals</p>

## **Emotional Development: Balancing Thoughts and**

<b>Feelings*</b>						
Expresses feelings about life's disappointments and recovers.					Wounded by life's disappointments and does not easily recover.	
<b>Age</b> (Years)	0-2	2-4	5-10	11-14	15-19	20+
Has a clear understanding of personal strengths and weaknesses.						
<b>Thought Development</b>						
Has alternatives and resources upon which to draw.	5%	10%	20%			
Demonstrates problem-solving skills when faced with an obstacle.						
Expresses appropriate emotion to any given circumstance.						
<b>Feeling Development</b>						
Recognizes and learns from mistakes.	95%	90%	80%			
Sets goals and takes steps to achieve them.						
*Percentages may vary based upon community and cultural factors. Looks expectantly to the future. Carlson, <i>The Psychology of Behavior</i> Rosse-Hamstra, <i>The Psychological Care of Children</i> drawing on increased awareness for strength and support.					Focuses on the present without creating a plan to move ahead. Sees little future and what is seen is bleak. Spiritual understanding is not applied	
<b>Comparison of Normal and Depressed Child</b>						
<i>Normal Child</i>					<i>Depressed Child</i>	

Expresses feelings about life's disappointments and recovers.  
Has a clear understanding of personal strengths and weaknesses.  
Has alternatives and resources upon which to draw.  
Demonstrates problem-solving skills when faced with an obstacle.  
Expresses appropriate emotion to any given circumstance.  
Recognizes and learns from mistakes.

Sets goals and takes steps to achieve them.

Looks expectantly to the future.  
Has a growing spiritual understanding, drawing on increased awareness for strength, hope and support.

Wounded by life's disappointments and does not easily recover.  
Underestimates personal strengths and dwells on weaknesses.  
Feels "stuck" and unable to generate choices or call upon resources.  
Lacks skills to proceed when obstacles arise.

Expresses inappropriately intense emotion or total lack of emotion to life's circumstances.  
Considers mistakes as failure and dwells on lack of self-worth.  
Focuses on the present without creating a plan to move ahead.  
Sees little future and what is seen is bleak.  
Spiritual understanding is not applied to circumstances and offers no resource for strength, hope, or support.

## **Development of Emotional Interpersonal Maturity**

In looking at interpersonal maturity theory<sup>1</sup>, seven successive stages characterize psychological development. They range from the least mature interpersonal interactions of a newborn infant to an ideal of social maturity, which is seldom reached in our present culture. Each of the seven stages or levels is defined by a crucial interpersonal problem, which must be solved before further progress toward maturity can occur. All persons do not necessarily work their way through each stage, but may become fixed at a particular level. Levels found in the juvenile population range from Maturity Integration Level 2 ( $I_2$ ) to Maturity Level 5 ( $I_5$ ). Level 5 is infrequent enough that, for the purpose of this training, levels 2 through 4 will be the focus of discussion.

### ***Maturity Integration Level 2 ( $I_2$ )***

The individual whose interpersonal understanding and behavior are integrated at this level demands that the world take care of him. He sees others primarily as “givers” or “withholders”. He is unable to explain, understand or predict the behavior of reactions of others. He is not interested in things outside himself except to give him what he needs. He behaves impulsively, unaware of the effects of his behavior on others. He is described as a cup with a hole in the bottom of it.

### ***Maturity Integration Level 3 ( $I_3$ )***

The individual operating at this level sees his world in black and white. He underestimates individual differences in others, leading to inaccurate predictions of how others will respond to him. A clear and consistent structure is necessary for him. His behavior is not based on an inner value system, but upon his perception of the external power source in the structural system. He believes that his problems would be solved if others around him would change. The thinking processes of the  $I_3$  are concrete with little motivation for integrating change and an inability to process deeper or alternative meaning. His focus is on rules and roles.

### ***Maturity Integration Level 4 ( $I_4$ )***

An individual whose understanding and behavior are integrated at this level has internalized a set of standards by which he judges behavior, both his own and the behavior of others. He is aware that others influence him and that they have expectations of him. He is somewhat aware that his own behavior affects others. He wants to be like those he admires. He may feel guilty about not measuring up to his own internalized standards, which may lead to neurotic symptoms or acted out in antisocial behavior. He will have a broader perspective and be more future-focused.

It is important to remember that interpersonal development is a continuum and the Integration Levels described here define points along that continuum. Individuals are best

classified at the level that represents their typical mode of functioning or their capacity to function under stressful conditions.

1 The Development of Interpersonal Maturity: Applications to Delinquency." Psychiatry, 1957, 20, 373-385.

## **Emotional Interpersonal Maturity Integration Level Interviews**

Integration level interviews help obtain information about a young person's view of the world, of himself, of others and his perception of how the relationship works among the three. Information may also be obtained about how he will behave based upon these perceived relationships. In conducting an interview, it is important to start with broad questions to ensure the perception of the interviewee is being obtained and not that of the interviewer. Let the juvenile's answers to the broad question lead to more specific questions. Remember to ask open-ended questions. Questions need not be asked in the order given, and will flow more naturally as they are related to the student's previous answer.

### **Interpersonal Maturity Integration Interview**

#### *School and Future*

How do you feel about school? Why?

What do you like most about school? (Least?) Why?

What kind of teacher is best for you? (Worst?) Why?

Do you like to plan for the future or take things as they come? Why?

What do you want to be when you are grown?

How can you make this possible?

#### *Friends and others*

How important do you think friends are? Why?

What kind of people do you prefer as friends? Why?

How do you go about choosing a friend?

When you meet someone for the first time, what things about them would make you want to be their friend?

What kind of person do you dislike? Why?

How large is your group of friends? More or less than most?

How close are your friends?

What makes the difference between a close friend and an average friend?

What kind of people do you most admire? Want to be like?

Who is a hero to you? Why?

### *Family*

What ideas do you have about a family? How should a family be run?

What do you think is most important in making a family work?

What kind of man is your father? What do you admire most about him?

What kind of woman is your mother? What do you admire most about her?

What does your family believe in?

Where do you fit into your family?

### *Handling problems*

Are you a person who has strong feelings about things or are you more easy-going?

What happens when you have strong feelings?

What makes you feel really down? How do you think others feel about that?

What do you do when you feel really down?

What makes you feel really happy? What do you do when you feel that way?

### *Self*

What kind of person are you? How would someone else describe you?

What do you consider your strong points?

What are things about yourself that you don't like? What do you usually do about them?

How is your health?

How are you sleeping? (Trouble getting to sleep? Nightmares?)

### *Maturity*

How would you describe a mature, adult?

How can you tell what a mature person is like? (Ask for specific details)

How does a mature person get that way?

How mature are you? In what ways are you mature and not mature? (Ask for specifics)

How important is it to be mature?

How do people change? Why do they change?

How do you change?

*Closure*

How did you feel about our time here? How did it go?

What did you think about while we were talking?

What did we seem to be trying to accomplish in this time?

What else would you like to tell me?

*After the interview, the interviewer reflects on:*

How did this young person behave?

How did I feel as the interviewer?

What are my immediate impressions?

## Sample Responses to Integration Level(I<sub>2,3,4</sub>) Interview

*What kind of people do you prefer as friends?*

I<sub>2</sub> – “People who do what I like to do.”

I<sub>3</sub> – “People who are nice and treat me good.”

I<sub>4</sub> – “People who think things through, consider their choices and make good ones.”

*How do you go about choosing a friend?*

I<sub>2</sub> – “If they like to do what I like.”

I<sub>3</sub> – “They like to do the same things I do and we get along pretty well.”

I<sub>4</sub> – “I watch what they do to see how they treat others. Then I talk to them and see if we have the same interests.”

*What kind of person do you dislike?*

I<sub>2</sub> – “They won’t let me do what I want.”

I<sub>3</sub> – “They are mean. They get me in trouble. They don’t follow the rules.”

I<sub>4</sub> – “Someone who is disrespectful and treats others poorly. Someone who is easily angered and acts immaturely.”

*What makes the difference between a close friend and an average friend?*

I<sub>2</sub> – “I don’t know, maybe they give me stuff.”

I<sub>3</sub> – “A close friend cares about me. They like me and treat me nice.”

I<sub>4</sub> – “A close friend gets to know me better. I can confide in them. They know my strengths and weaknesses and are still my friend.”

*Who is a hero to you? Why?*

I<sub>2</sub> – “My Dad because he gives me lots of.”

I<sub>3</sub> – “Someone who does something brave.”

I<sub>4</sub> – “People who learn how to deal with life and seem to find ways to manage it. My

teacher is one of my heroes because he has made something important out of his life.”
